PROFILE

Front-End Developer (Next.js & React.js) with 2+ Years Freelance Experience, I possess a demonstrated ability to rapidly acquire new skills and implement them in the development of responsive and user-friendly web applications. I have passion for applying responsive design principles and witnessing my web pages seamlessly adapt to mobile screens. Additionally, I hold reputable online certifications relevant to this field. Despite my current role as a freelance web developer, I am fully prepared to transition to full-time employment. My experience in this domain extends to approximately one year, which I have gained alongside my primary occupation. I am continually dedicated to advancing my expertise and exploring emerging technologies for continuous learning and adaptation.

PROFESSIONAL EXPERIENCE

Front End Web Developer

Feb 2023 – present

Freelancer

- Aligned user interface and front-end components to support user engagement goals.
- Developed and implemented engineering standards for web development.
- Conducted regular reviews and updates to ensure compliance with industry best practices.
- Optimized website performance through continuous monitoring and testing.
- Implemented responsive design principles to enhance user experience.

Technical Support Specialist

Oct 2022 – present

Market Makers

- Provided technical support to troubleshoot systems.
- Prioritized workload to address most critical issues first.
- Communicated with team members to diagnose problems effectively.
- Documented troubleshooting steps and solutions for future reference.

Sales Staff

Jul 2022 – Dec 2022

Attijariwafa Bank

- Trained and mentored new sales representatives.
- Developed and implemented sales strategies to increase revenue.

- Collaborated with cross-functional teams to optimize sales processes.
- Analyzed sales data to track performance and identify areas for improvement.

Customer Service Call Center Agent

Jan 2018 – May 2018

B TECH

- Achieved a high satisfaction rate by solving customer problems with one call.
- Managed high call volumes while maintaining a positive attitude.

- Collaborated with team members to resolve complex customer issues efficiently.
- Adapted quickly to new information and updates on products and services to provide accurate assistance.

SOME PROJECTS

Aura Beauty

E-Commerce Website

- Next.js for fast, SEO-optimized pages
- Redux Toolkit and Redux Persist for efficient case management
- Supabase for product uploading, modification, and order processing
- Vercel for easy website build and deployment
- Facebook Pixel for tracking ad performance
- Chakra UI for a sleek, responsive design
- GSAP and Frame Motion for smooth animations that enhance the user experience
- React Hook Form for dynamic forms
- React Toastify for streamlined notifications
- Lenis for easy scrolling
- Swiper for carousel product listings
- Slugify for clear, easy-to-read links

Pop Movie

Movie Website

- Axios for efficient HTTP requests to The Movie Database (TMDB) API
- TMDB API Integration to fetch popular, top-rated, and searched movies dynamically
- React Router for client-side navigation between Home, Search, and Movie Details pages
- React Context API for lightweight global state management (e.g., user favorites)
- React.lazy & Suspense for code-splitting and faster initial load times
- React Icons for crisp, vector-based iconography throughout the UI
- Framer Motion for smooth page transitions and hover animations that elevate user engagement
- React Infinite Scroll Component for continuous loading of movie lists as users scroll
- Lodash.debounce to optimize the search input and minimize unnecessary API calls
- Environment Variables (.env) for secure management of the TMDB API key
- Netlify for zero-config deployment and automated previews on each push

Portfolio

Portfolio Website

- Next.js 14 for fast, SEO-friendly static and dynamic routing
- TypeScript for strong typing and maintainable codebases
- CSS Modules for scoped, modular styles and fully responsive layouts
- next/font/google to load and optimize Google Fonts with minimal layout shift
- Next/Image for automatic image optimization and lazy loading
- Framer Motion for smooth page-load and scroll-triggered animations
- React Icons for a crisp, consistent icon set throughout the UI
- EmailJS (or similar client-side service) for secure contact-form submissions without a dedicated backend
- ESLint & Prettier to enforce code quality and consistent formatting across the project
- SEO Metadata configured with 'next/head' for optimal discoverability
- Vercel for zero-config CI/CD, instant previews on every push, and global edge deployments
